Step 1

Sew an open rectangular 4 point stitch pattern beginning and ending at the center bar tack. Leave a 1" open loop as shown.

NOTE;
This loop will now be used ONLY for the RSL pin, and Skyhook Lanyard!

Fig 1

Pre-made loop with label as shown.

NOTE;
Left cutaway cable will now pass through this loop ONLY!

Step 2

Line up folded edge of secondary gold loop, with raw edge of pile Velcro, and install 3 bartacks. There should be a 1/2" offset between both loop ends as shown.

Fig 2A

Fig 2B

Bartack over folded edge should step off.

Fig 2C

Notice Tyvec label underneath gold secondary loop, and in between both loops.

Fig 2D

Back side of modified RSL showing bartacks fig 2B, 2D.

Fig 2E

View of RSL with secondary loop after completed.

Step 3

NOTE;

3 different views of installed RSL on a standard Sigma Tandem.

Notice how the left side cutaway cable is passing ONLY through the Gold Loop, and the black 1" type 4 has both the RSL pin, and Skyhook lanyard larks-headed on the end
