**To whom it may concern:**

Re: Sigma Tandem System

Uninsured United Parachute Technologies, LLC (UPT) does not endorse or approve the use of any canopy in the Sigma Tandem System other than Vector Tandem Canopies (VTC and VTCR), the EZ range of canopies and the Sigma range (SG340, SG370, SG395, SR340, SR370) of canopies, manufactured by Performance Designs, Inc. for UPT.

This range of canopies was tested with the Sigma Tandem System as a complete system. UPT has never tested any other manufacturers' canopies regarding compatibility, quality and performance in the Sigma Tandem System, and therefore cannot predict compatibility, quality, performance, or the safety of use of any other canopy. Any use of canopies, or components other than those specifically recommended by United Parachute Technologies for use in the Sigma Tandem System is solely at the user's risk and peril.

Further, the use, in the Sigma Tandem System, of any canopy or component other than those recommended by UPT, will result in the end-user assuming all responsibility for any and all consequences and damages, and in the indemnification of UPT by the end-user, as stated in UPT's end-user agreement.

Yours Truly,

Mark Procos  
General Manager  
Uninsured United Parachute Technologies LLC.
