**Re: Discontinuation of VR360 Vector Tandem Reserve**

With the introduction and upcoming 2021 release of the new **Sigma II Tandem Reserve (SR-340 and SR-370)**, Uninsured United Parachute Technologies, LLC has received inquiries about existing **VR360 Vector Tandem Reserve (VTC-xxxR)** canopies currently used;

Effective immediately, the VR360 Vector Tandem Reserve is discontinued as a product and can no longer be ordered new.

Existing VR360s will continue as approved tandem reserve canopies, and can be installed, packed, and used per published manuals. Support, maintenance, and parts availability will remain.

The VR360 Vector Tandem Reserve will not receive any updates to the original design, including weight limit, construction, line types, and attachment links.

Any changes to the original VR360 canopy design are not permitted, supported by continued testing data since the original release.

The Sigma II Tandem Reserve is a new product, to be released following separate R/D, testing, and certification, and can therefore not be directly compared to the legacy VR360 Vector Tandem Reserve design.
